

GENERAL DIRECTIVES ABOUT WRITING

- ❖ It is not essential to be registered as members in order to submit an article. The articles submission is only done electronically.
 - ❖ The articles are reviewed by the Editorial Board, which, thereafter, will contact you for potential corrections or simply in order to inform you for the timetable of your article publication.
 - ❖ We do not collect personal data during the on-line submission of the articles or propositions for the journal. Telephone numbers, E-mails or other information which may be asked, are exclusively collected for contacting you and for your faster service. The secrecy of the IP addresses and the electronic information is strictly observed.
- 1) Each submitted article should be written both in Greek and in English.
 - 2) The whole text should be written with Times New Roman font.
 - 3) It should be double-spaced.
 - 4) The pages should have margins 2,5 cm above, below, right and left.
 - 5) The main text should be in size 12 font. Further clarifications for the remaining text are analytically reported below.
 - 6) The title of the article should be written in bold capital letters.
 - 7) The profession of the author, the institution-university in which he/she belongs and the writing date should be written in size 10 font.
 - 8) The terms summary, introduction, sections of the article, any sub-sections of the article, conclusion and references should be written in bold and underlined writing and Times New Roman font. Instead of using size 12 font in the references part, you should use size 10 as it appears in the model.
 - 9) The term Key-words in Times New Roman, size 12 and underlining font.
 - 10) References should be numbered with alphabetical order or simply numbered.
 - 11) In all the text extent, wherever you use a piece of information reported by a certain bibliographic source, the number of the source that corresponds to the one which is entered in the bibliography should be written in parenthesis.
 - 12) The uncut phrase transfer from foreign texts is prohibited and that's why there is a validation by our editorial board.
 - 13) The size of a section should be similar to the other sections size, something that is also applied to the paragraphs, etc.
 - 14) The reviews text should be about 12 pages with no exceed of this limit allowed (references are also included).

Serial of articles, aiming at the work and offering promotion of the University of Thessaly-Medical School in Greece and abroad.

Historical data - photographic material.

Special articles dedicated to Hippocrates, his life and work in Thessaly

Scientific and educational news.

There will be a column in each copy of our journal, named top five, where five of the top medical news will be reported. There is also a permanent part of the journal located to the right, where both medical news in Greece (Greek language) and international medical news (in general or per category, in English language) are reported. However, there might be also articles written, in which some of the most important news of the health field and of medical education throughout the whole world, will be reported.

Medical issues reviews and research studies.

Bibliographic review of medical issues regarding any specialty and medical research studies. There will be issues which will be dedicated to specific medical subjects, something that will be announced in time.

Presentations-Announcements in medical congresses.

Presentations in medical congresses of any specialty. The congress in which they were presented and also the location and the date of the congress conduction should be mentioned.

Visual assimilation (multimedia) - Photographic material.

Photographic and audiovisual material regarding any medical subject. It is preferred that you combine the article that you write, with some corresponding audiovisual material that you should separately submit.

Medical cases presentation.

Interesting clinical cases, where there will be an evaluation of the patient medical record (without referring the patient name), his/her examinations in the

differential-diagnose frame, etc. and the whole differential-diagnostic approach and thereafter the diagnosis confirmation (if this has been done) with the proposed treatment shall also be mentioned.

Research and researcher.

The research in Greece.

There will be interviews dedicated to a researcher of Greece or even abroad. Some elements of the researcher biographical sketch as well as elements of his/her inquiring work and offering in the medical science will be presented.

Professional re-establishment – Medical Specialties – Career.

There is a permanent special part of each issue located to the right, where essential information for doctors is included (medical specialties, medical congresses). However, there might be articles, regarding any subject which concerns the professional re-establishment, specialties and career, written in the journal issue.

The doctor's role in the modern society. The doctor-patient relationship.

Articles presenting the role of the doctor based on the present situation, description of the modern data that the development of the society imposes and report for the doctor and patient interaction way.

Medical deontology. Moral reflections.

Articles concerning the deontology code of the medical action and subjects which need moral investigation and perturb the modern medical community.

Communication Channel - your letters.

Subjects puzzling you in relation to the medicine field or even our journal improvement, as well as any clarification or query, may be published in the blog that we have created in the electronic address <http://helmedica.blogspot.com> where we might communicate openly in order to maintain a world channel of direct communication.

NOTE: Those who wish to receive the special program for easy references classification, may contact us via the E-mail: info@helmedica.gr
